

Moving around

Hold spacebar then click and drag to move around.

Find it

Hold **spacebar** then click and drag to move around

See it

Try it

- ① Hold **spacebar** until you see a hand
- ② Place your **cursor** over the stickies, then **click and drag**

 Edit the board when your cursor looks like a **pointer** (v). Move around with the **hand** (h).

Zooming in and out

Use the plus and minus keys on your keyboard to zoom in and out.

Find it

Use the **plus** and **minus** keys on your keyboard

See it

Try it

- ① Center your screen on the small text below
- ② Use the **plus** and **minus** keys to zoom in and read the message

 Alternatively, use the **scroll wheel** on a mouse or **pinch** on a trackpad.

Have a play

Use the tools to get familiar with adding content.

Housekeeping

Rules regarding webcams

Keep your Webcam on throughout the delivery

Rules regarding mute

Keep your Microphone off throughout for privacy unless you are asked or need to respond.

Frequency of breaks

Short Breaks are scheduled every hour to support you with your learning.

Rules regarding group participation

Everyone should equally participate in Group discussion and take lead in contributing your view.

Rules regarding questions

The Golden Rule:

'There is no such thing as a stupid question'

'Even when asked by an instructor'

Please have a go at answering questions

Also:

'A question never resides in a single mind'

By asking questions, you are helping everyone out!

4	Key	Attributes	Data Types	Constraints/comments	
5	FK	Movie_ID	INT	NOT NULL	
6	FK	Director_ID	INT	NOT NULL	
7					
8					
+					

Task 3

Identify entity relationships. Draw an **Entity Relationship Diagram** showing the relationships (cardinality) between the entities (tables) you identified in Task 1.

Entity 4

	Column	Column1	Column 2	Column 3	+
1	Links actors to movies (many to many)				
2	Movies				
3	Movie_Actor				
4	Key	Attributes	Data Types	Constraints/comments	
5	FK	Movie_ID	INT	NOT NULL	
6	FK	Actor_ID	INT	NOT NULL	
7		Character	VARCHAR(100)	NULL	
8		Cast_order	INT	NULL	
+					

Task 2

Compile data dictionaries for your identified entities.
You may use the pro forma on the following page (or any other valid format).
You should include any Keys (Primary and Foreign), Data Types for each attribute and any suitable constraints i.e. Null, Not Null

<

Activity 1: Movies Database Normalisation

Learner instructions

We have been given the task of creating an online resource based on movies produced in the last 50 years.

One of the features of this resource will be a RDMS that will store details of the personnel and production information relating to a large number of films.

We have an Excel file provided with data that has been partly normalised in that some of the entities and their attributes have already been identified.

However one of the sheets on the Excel file labelled Movies and Actors still needs to be normalised before it is suitable for the RDMS.

Screenshots can be seen below of this table and its attributes.

Task 1

The attributes in the Movies and Actors table are:

Director

Actor

gender

character_name

cast_order

movie_id

title

budget

homepage

overview

popularity

release_date

revenue

runtime

movie_status

tagline

vote_average

vote_count

Identify and name potential entities from the information supplied.

Remember that there may be many-to-many relationships between the tables that would require a bridging table (a table containing the foreign keys of the tables to be joined)

Think about the fact that and actor can play many characters but these characters can appear in a number of movies i.e. Luke Skywalker appears in Star Wars but also in The Empire Strikes Back!

Also when you create any of the main tables from they will need a Primary Key attribute that may need to be added for example director_ID

Identify and name potential entities from the information supplied.

Hint:

There are at least 5 entities needed and 2 of these are bridging tables.

- a.
- b.
- c.
- d.
- e.

Task 2

Compile data dictionaries for your identified entities.

You may use the pro forma on the following page (or any other valid format).

You should include any Keys (Primary and Foreign), Data Types for each attribute and any suitable constraints i.e. Null, Not Null

Entity description

Database

Entity name

Key

Attribute

Data Type

Constraints/comments

Task 3

Identify entity relationships. Draw an **Entity Relationship Diagram** showing the relationships (cardinality) between the entities(tables) you identified in Task 1.

Show the Primary and Foreign keys to show how tables would relate to each other i.e. The Primary key of one table (Parent) would become the Foreign key in its related table (Child)

Hint:

Bridging tables that are used to avoid many-to-many relationships are basically formed of two one-to-many relationships.

The diagram below shows the “many-to-many” relationship to avoid duplicate values or multiple values in the one column, between Orders and Products.

OrderID and ProductID have become foreign keys in the OrderDetails table.

Replace the image above with your own Entity Relationship Diagram (ERD)

<https://online.visual-paradigm.com/>

Entity 2

	Column	Column1	Column 2	Column 3	+

Task 1

Identify and name potential entities from the information supplied.

There are at least 5 entities needed and 2 of these are bridging tables.

1. Director Details
2. Actor Details
3. Movie Details
4. Character Info [Bridge]
5. Movies and directors [Bridge]
6. Characters

Movies and Actors Database

Director	Actor	gender	character_name	cast_order	movie_id	title	budget	homepage	overview	popularity	release_date	revenue	runtime	movie_status	tagline	vote_average	vote_count
Quentin Tarantino	Tim Roth	Male	Ted the Bellhop	43	31	Star Wars	11000000	http://www.starwars.com/films/star-wars-episode-iv-a-new-hope	In a futuristic city sharply divided between the	12.381527	18/01/1997	809420	134	Released	There can be no understanding between the hand	8	461

				54	31	Star Wars	11000000	http://www.starwars.com/films/star-wars-episode-iv-a-new-hope	In a futuristic city sharply divided between the	12.381527	18/01/1997	809420	132	Released	There can be no understanding between the hand	8	461

The attributes in the Movies and Actors table are:

- Director
- Actor
- gender
- character_name
- cast_order
- movie_id
- title
- budget
- homepage
- overview
- popularity
- release_date
- revenue
- runtime
- movie_status
- tagline
- vote_average
- vote_count

Entity 5

	Column	Column1	Column 2	Column 3	+
1	Entity description				
2	Database				
3	Movies and Directors	[BRIDGE]			
4	Key	Attributes	Data Types	Constraints/comments	
5	FK	Movie_ID	int		
6	FK	Director_ID	int		
7					
8					
+					

Task 3

Identify entity relationships. Draw an **Entity Relationship Diagram** showing the relationships (cardinality) between the entities (tables) you identified in Task 1.

Entity 4

	Column	Column1	Column 2	Column 3	+
1	Entity description				
2	Database				
3	Character Info	[BRIDGE]			
4	Key	Attributes	Data Types	Constraints/comments	
5	FK	MovieID	int		
6	FK	ActorID	int		
7	FK	CharacterID	int		
8		Cast Order	int		
+					

Task 2

Compile data dictionaries for your identified entities.
You may use the pro forma on the following page (or any other valid format).
You should include any Keys (Primary and Foreign), Data Types for each attribute and any suitable constraints i.e. Null, Not Null

Entity 6

	Column	Column1	Column 2	Column 3
1	Entity description			
2	Database			
3	Character			
4	Key	Attributes	Data Types	Constraints/comments
5	PK	Character_ID	int	
6		Character Name	int	
7				
8				
+
